Your Reliable Partner for Infor ERP Integrations

HubKor is a cloud-based integration platform that sync tightly between many best-of-breed Cloud applications to Infor cloud and On-prem ERP Solutions.

ALERAN SOFTWARE is a fully integrated end-to-end digital commerce platform designed to accelerate sales for B2B manufacturers, wholesalers, and distributors. Aleran makes it easy and efficient to digitize sales and orchestrate multi-channel sales and personalize buying experiences, reducing the time to sale and cost of sales through eCommerce, Customer Portals, and more.

Integration Overview

Streamline your workflow with a **2-way sync** that tightly integrates CRM automation processes with Infor ERP, delivering a complete 360° view in Aleran—from opportunity to order shipment.

Item Management

Efficiently sync products for initialization or obsolescence.

Inventory Management

Sync product quantity availability or leverage optional real-time API calls.

Pricing Sync

Sync list pricing or use real-time API calls to apply ERP pricing rules.

Customer Orders

Automatically create Aleran orders with header and line details, handling bundles, kits and discounts. A new HubKor form in ERP ensures error handling. ERP updates, including sales order status and shipment details, are passed back to Aleran.

Customer Management

Set up customers as guest or recurring accounts. B2B customers can sync from ERP to Aleran, and new Aleran customers can be synced back to ERP. Sync contacts between Aleran and ERP for streamlined management.

Customer Ship-To

Create shipping addresses on the fly for guest or customer accounts.

Payments & Credits

Apply customer payments upon order creation or shipment. Easily create and apply credits to original orders. Utilities are available to reapply prepayments upon invoicing and manage credit issuance.

Shipments

Notify Aleran to fulfill customer orders upon shipment and trigger automatic emails to customers. Capture payments if set to do so at the time of shipment.

Multi-Store Support

Supports multiple Aleran stores, sites, and currencies for a global reach.

Services Provided

- Hosted on AWS Platform to offer **scalability, reliability, and security**.
- Fully managed **end-to-end Service** provided by ERP and Aleran experienced professionals.

Your Reliable Partner for Infor ERP Integrations

HubKor is a cloud-based integration platform that sync tightly between many best-of-breed. Cloud applications to Infor cloud and On-Prem ERP Solutions.

salesforce

is a cloud-based CRM platform that helps businesses manage customer interactions, store, track, and analyze customer data to enhance sales, marketing, and service operations. It offers customizable features such as contact management, opportunity tracking, AI insights, and reporting tools.

Integration Overview

Field Service

Your Reliable Partner for Infor ERP Integrations

HubKor is a cloud-based integration platform that sync tightly between many best-of-breed. Cloud applications to Infor cloud and On-Prem ERP Solutions.

is the simplest way to manage your service orders and repair operations seamlessly between Salesforce and Infor ERP. With direct integration, you can eliminate redundant data entry, streamline inventory tracking, and ensure accurate invoicing.

Integration Overview

The integration between Salesforce Service Cloud and Infor ERP ensures a smooth and efficient workflow for service order management. This integration automates critical processes, reducing manual intervention and increasing operational efficiency.

Service Order Creation

Service Orders initiated in Salesforce automatically generate Service Repair Orders (SROs) in Infor ERP, eliminating redundant data entry.

Inventory Synchronization

Required repair components are transferred to technicians' trucks in Infor ERP ensuring real-time inventory accuracy.

Job Execution

Technicians are dispatched via Salesforce and issue materials and labor, which can then be synced back to Infor ERP for tracking.

Billing & Financial Processing

Invoices are created in Salesforce based on quoted prices and synchronized to Infor ERP for financial closure and A/R processing.

Tax Compliance

Service orders marked as taxable in Salesforce are integrated with Infor ERP's Avalara (AvaTax) for precise tax calculations.

Order Modifications & Adjustments

Service orders and issued materials can be modified in Infor ERP, with real-time updates synchronized to Salesforce.

Services Provided

- **Automated Service Order Creation** – Service Orders in Salesforce instantly generate SROs in Syteline.
- **Real-Time Inventory Updates** – Inventory adjustments sync automatically between Syteline and Salesforce.
- **Technician Job Dispatch** – Assign and track job assignments with ease within Salesforce.
- **Material & Labor Tracking** – Record issued materials and labor charges for complete job costing.
- **Flexible Adjustments** – Modify issued materials, serial numbers, and labor charges as needed.
- **Tax Compliance & Integration** – Integrated with Avalara (AvaTax) for accurate tax calculations in Syteline.

Your Reliable Partner for Infor ERP Integrations

HubKor is a cloud-based integration platform that sync tightly between many best-of-breed. Cloud applications to Infor cloud and On-Prem ERP Solutions.

Enhance customer service and streamline operations with Salesforce Service Cloud, seamlessly integrated with Infor ERP. Our AWS-hosted solution ensures scalability, security, and reliability, managed by experienced Salesforce and ERP professionals.

Integration Overview

The Salesforce Service Cloud and Infor ERP integration streamlines service, sales, and inventory management by ensuring real-time data synchronization across key business functions.

- **Product & Pricing Sync** – Automatically updates product catalogs, pricing, and discounts across systems.
- **Customer & Contact Management** – Maintains accurate customer records and shipping addresses for seamless order fulfillment.
- **Inventory & Order Processing** – Enables real-time stock visibility, reduces manual entry by converting Salesforce quotes into Infor ERP orders, and ensures accurate service scheduling.
- **Billing & Shipping Updates** – Syncs invoices, credit notes, and shipment tracking for enhanced customer service.
- **Advanced Features** – Supports AI-powered insights, automation, e-commerce, service contracts, and field service for a complete customer experience.

1. Case & Ticket Management

- Automatically create cases in Salesforce from emails, calls, or web forms.
- Sync case details, resolutions, and escalations with Infor ERP for full service history tracking.
- Prioritize and route cases with AI-powered automation (Einstein AI) to speed up resolution times.

2. Omnichannel Customer Engagement

- Support customers across phone, email, chat, social media, and SMS for a seamless service experience.
- Implement chatbots to handle basic inquiries and escalate complex issues to agents.
- Provide self-service options with an AI-driven knowledge base and customer portals.

3. Service Order & Field Service Automation

- Sync service orders between Salesforce and Infor ERP to streamline dispatching, scheduling, and technician tracking.
- Provide mobile access for field technicians to view customer history, invoices, and service details.
- Automatically update spare parts inventory in Infor ERP based on service requests.

4. Warranty & Contract Management

- Track warranty claims, repairs, and contract renewals within Salesforce Service Cloud.
- Sync service agreements and maintenance plans with Infor ERP for billing and fulfillment.
- Send automated notifications for contract expirations and renewals.

5. AI-Driven Service Insights & Reporting

- Use Salesforce Einstein AI to identify recurring service issues and recommend solutions.
- Gain real-time insights into customer satisfaction, agent performance, and service trends through dashboards.
- Ensure compliance with service-level agreements (SLAs) by tracking response and resolution times.

Why Integrate Salesforce Service Cloud with Infor ERP?

- ✓ **360° Customer Visibility** – Get real-time updates on orders, service requests, and customer interactions.
- ✓ **Enhanced Response Times** – AI-driven automation speeds up case resolution and technician dispatching.
- ✓ **Seamless Communication** – Ensure consistent customer service across email, chat, phone, and social media.
- ✓ **Scalability & Flexibility** – Support multi-location, multi-currency, and multi-language operations.
- ✓ **Data Security & Compliance** – Hosted on AWS with enterprise-grade security and data protection.
